

Nexus Projectes' direction is aware of its responsibilities related to its stakeholders, considers the protection of the environment as a central line of action and a fundamental aspect in the development of its production process. Because of this, Nexus Projectes has the following principles:

1. **Protection of the environment**, by controlling the impact of our activities, we influence the environment, preventing contamination and implementing the necessary actions in order to reduce environmental adverse results.
2. **Compliance with the environmental legislation**, Nexus Projectes is committed to follow the legal and regulatory compliance, as those recommendations or voluntary standards that Nexus decides to apply.
3. **Promoting continuous improvement**, Nexus Projectes shows a continuous ability to detect deviations and act towards them, as well as detection of creative and anticipative actions to mitigate environmental impacts.
4. **Management system implementation and maintenance**, Nexus Projectes is committed to promoting and implementing a management system based on the ISO 14001: 2015, assuming the regulatory requirements
5. **Promote environmental awareness**, train and raise awareness on workers about the environmental importance.
6. **Enhance accountability** on all levels of the organization to ensure compliance with the EMS requirements.
7. **Suppliers and subcontracts**, to promote in our partners the awareness of control and reduction of polluting agents in their processes.
8. **Communication**, Nexus share with its stakeholders the environmental policy, its objectives and commitments.

By signing this document, management commits to its application, asking each Nexus Projectes worker for their commitment in executing the necessary actions to implement the EMS.
